Specifications/Scope of Work

Measurements are based on actual in place square yards measured at the close of each business day and mutually agreed upon with a representative of the contractor and the representative for the DPW. Forms that state the quantities will be provided by the DPW and signed by each representative on a daily basis.

It is the intent of the Town of Salem, NH to purchase the following product/s.
The quantities are estimates only. The obligations incurred by the acceptance of any bid are limited to the purchase of the department's actual requirements.

Approximately 3000 sq. yds Infra-red material

The Town of Salem, NH will make every effort possible to schedule this work to accommodate at least 4 hours work for each crew, but the hours cannot be guaranteed. (1/2 day)

INFRARED ASPHALT RESTORATION

Intent: to provide a smooth, joint less, and durable asphalt restoration using the infrared method of asphalt pavement patching.

1. The equipment used for heating the pavement must be capable of producing a true infrared ray with a minimum of convection heat.
2. The area to be patched will be cleaned and free of foreign matter or debris.
3. The Infrared heater will be positioned over patch area in such a way to insure heating a minimum of twelve inches beyond edge or joint of area to be restored.
4. The infrared heater will be approx. seven minutes, depending on ambient temperature and condition of the pavement. An experienced operator can tell exactly when optimum heating penetration has occurred. Under no condition can pavement be allowed to overheat to a point of damaging asphalt binder.
5. The area to be patched will be neatly outlined (picture framed) with the back of an asphalt rake. This will be approx six inches outside of area to be patched and approx six inches within the heated area. Using a long tong asphalt rake, this area will then be deeply and thoroughly scarified.
6. Additional asphalt will be added, as needed, to bring work area to proper grade allowing for compaction.

7. The asphalt used for make-up material must be kept at proper working temperature of 270 to 300 degrees F. This will be accomplished by the use of an infrared reclaimer storage unit. The asphalt to be used will be 3/8" top mix or as directed by the Town of Salem, NH for which work is being done.

8. Compaction will be accomplished by use of a vibratory pavement roller with a capacity equal to a three to five ton static roller. Proper technique will be employed to assure proper bonding and compaction to produce a smooth finished restoration.

9. Traffic must be kept off patch area to allow proper cooling time to prevent damage or distortion of patch.
